

SAVAGE CAPITALISM

**Is it the engine
of the world?
Or the beginning
of its end?**

**Is it the engine
of the world?
Or the beginning
of its end?**

www.neocosmos.space

The NeoCosmos way of thinking is born from logic, reason, and common sense, starting from what we can observe and reflect upon. Free from inherited ideologies and narratives, each book offers a direct and easy-to-read vision. It does not seek to convince, only to provide clarity so the reader can think for themselves.

CAPITALISM

THE AUTONOMOUS MECHANISM

We interpret the global market as a political system guided by human ethics.

We imagine architects behind every economic shift.

This book rejects that view. The market is described as an emergent, blind algorithm:

an efficiency-seeking process
indifferent to life and sustainability.

The system does not conspire against us—it simply optimizes toward profit, even at the cost of the species that created it.

Sample – Chapter 1: THE AUTONOMOUS MECHANISM

The dominant economic system was not designed. No one sat at a table to draft its blueprints or define its ethical principles. Its appearance was, instead, the consequence of millions of individual actions, each pursuing a particular interest, but all aligned by one single operating principle: the pursuit of profit. It spread across the world not because it was the best that existed, but because it was functionally effective. It produced results, generated material wealth, and offered the tangible sensation of immediate progress.

From its initial configuration, the mechanism has operated without

incorporating emotional variables. Its functioning is cold and practical. The impulse that activates and perpetuates it is not a mandate of justice nor a pursuit of collective well-being, but the competition for resources and control of markets. Once this economic system was set in motion, it did not stop. Its evolution has not consisted in changing its purpose, but in perfecting its methods to ensure its own continuity, learning to camouflage its primary function under narratives of freedom, innovation, and opportunity.

Index of Chapter (7)

THE AUTONOMOUS MECHANISM

Origin of capitalism as a self-sustaining force.

THE BUSINESS ABSORPTION CURVE

Illusion of competition versus true concentration.

THE SURPLUS HUMAN

Automation and the rise of human obsolescence.

THE CAPTIVE CONSUMER

Planned obsolescence and forced consumption cycles.

THE DESTROYED PLANETARY EQUATION

Growth without limits on a finite planet.

TERMINAL COMPANY: YEAR 2150

Projection toward a single global corporation.

THE CONSCIOUSNESS BARRIER

Why reform from within is structurally impossible.

Extras

FINAL REFLECTION

PROJECTION TO THE YEAR 2050

The table below is one of
the 10 to 15 included in the
complete book, offering
additional perspectives to
view the topics from other
angles.

REFORM FROM WITHIN VS CONSUMER ACTION

Axis	Reform from Within	Collective Consumer Action
Mechanism	ESG, conscious capitalism	Boycotts, strategic omissions
Motivation	Profit framed as risk management	Ethical choice, direct resistance
Structural Effect	Adaptation of the system	True systemic pressure
Limits	Co-opted language of ethics	Requires massive coordination
Potential Impact	Cosmetic transformation	Genuine disruption of demand cycle

PRESENT SYSTEM VS TERMINAL COMPANY PROJECTION

Variable	Current Dynamics	Terminal Company 2150
Market Structure	Oligopolies with some diversity	Single global corporation
Human Role	Still partly employed	Fully surplus, only consumers
Governance	States with corporate influence	Company replaces state functions
Control Mechanism	Marketing, lobbying, digital data	Algorithmic scoring, full monitoring
Lived Reality	Mixed physical and digital worlds	Virtual reality dominance, artificial scarcity
