# THE CONSTRUCTION OF DIVINITY

Western tradition treats the Bible as a divine revelation, immune to error.

The current text is assumed to be a direct transcription of metaphysical intent.

This book approaches scripture through archaeology and philology.

It shows how mistranslations, political edits, and historical agendas transformed a historical preacher into a supernatural icon.

Jesus and the Bible are presented not as evidence of the divine, but as

projections of human fear, aspiration, and narrative need.

## **Sample – Chapter 1: THE ORIGIN OF A WORD: MIRACLE**

The word “miracle” is not what we think it is. It did not arise from a divine revelation nor was it first spoken to describe a heavenly act. Its origin is much more earthly, more recent, and above all, more human. It is the story of how a simple translation decision, made by one man four centuries after Jesus, forever changed the way the West would understand the relationship between the inexplicable and the divine.

To understand this, we must place ourselves in a world without the tools

we now take for granted. Before science, primitive human beings lived surrounded by phenomena they could not explain. A storm appearing out of nowhere, lightning striking a tree, an illness vanishing without apparent reason, or a crop thriving in the middle of a drought—these were all events that broke normality, happenings that escaped the understanding of a mind that did not yet have physics, biology, or meteorology. Faced with this void of knowledge, the response was not reason, but wonder and, often, fear.
